Programme Structure

Course Overview

This course introduces students to key psychological concepts, research methods, and human behaviour. It develops critical thinking and analytical skills, preparing students for further studies or entry-level roles in fields like counselling, education, and mental health services.

Assessment Methods

Students will complete a portfolio of evidence, which includes a combination of 6 written assignments covering key topics within the psychology sector.

Admission

Students must be 17 years or older and hold a Level 3 qualification or equivalent. Non-native English speakers should meet a minimum English language proficiency level of IELTS 5.5 or equivalent.

Technical Requirements

Our platform is fully technology-driven; therefore, students will need a reliable PC, laptop, or tablet, or regular access to the aforementioned. Students will need a stable internet connection with sufficient data to access online resources and participate in programme activities.

Course Structure

1

The Scope of Psychology

20 CREDITS

This module provides an introduction to the history of psychology, explores the different theoretical approaches, and discusses how psychology is applied in contemporary society.

2

Social and Developmental Psychology

20 CREDITS

This module covers key theories and research in social and developmental psychology, focusing on how social factors influence behaviour and how individuals develop over their lifetime.

3

Biopsychology

20 CREDITS

This module delves into the structure and function of the nervous system, exploring how different parts of the brain contribute to behaviour, and examines synaptic transmission and the fight-or-flight response.

4

Processes of Human Memory

20 CREDITS

This module investigates various models of memory, including the multi-store model and working memory model, and explores different types of long-term memory and the factors that contribute to forgetting.

Course Structure

5

Research Methods and Investigating Psychology

20 CREDITS

This module equips students with knowledge of research methodologies in psychology, including experimental design, statistical analysis, and ethical considerations in psychological research.
